DETAILED ACTION

Election/Restrictions

1. Claims 1-27 and 38-71 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Specification

2. The amendment filed 28 October 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is as follows:

Newly added claim 72 claims an apparatus for the delivery of an agent into an orifice, comprising a previously undisclosed combination of elements. The claimed invention is not disclosed in the specification or drawings as originally filed and constitutes new matter.

Specifically, Applicant had not originally disclosed an embodiment of the invention that includes: a bulb having a first internal chamber that holds an agent, wherein a first pathway connects the first internal chamber of the bulb to the second internal chamber (via gas separating means and second valve means); or a “bypass port means”.

The originally disclosed embodiment that most closely resembles that claimed appears in Figures 7a and 7b. In these Figures and the accompanying description, Applicant discloses an apparatus for delivery of an agent into an orifice, comprising a bulb having a first internal chamber (103) that holds an agent. A second internal chamber (110) in the device tip is connected to the inside of the bulb by a first pathway, via gas separations means and valve

means. Note that in this embodiment, the second chamber is connected to the bulb by the first pathway; it is not connected to the first internal chamber of the bulb that holds the agent, as claimed. It is unclear if Applicant is referring to valve (112) as the "bypass port means."

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 72-79 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, Applicant claims an apparatus for delivery of an agent to an orifice, including newly introduced structure and function, as described in the "Specification" section above. The originally filed disclosure and drawings do not support the apparatus as claimed, in claims 72-79.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3743

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
